THE NIAGARA

A compact 10 watt integrated tube amplifier

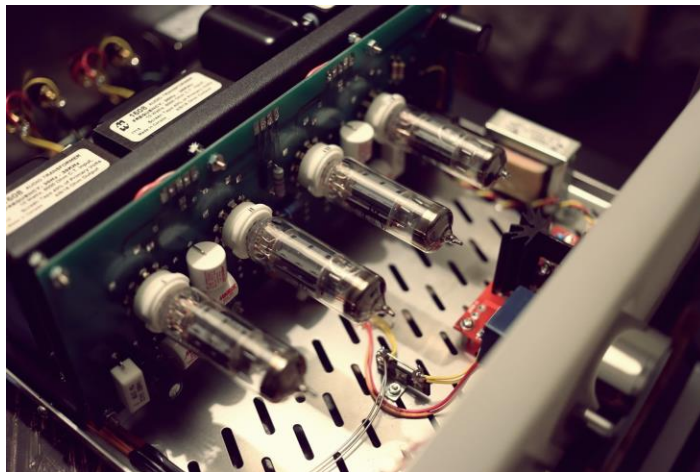

THE SPINE TINGLING SENSATION OF “*BEING IN THE ROOM*”

- ✓ ULTRA LOW NOISE, LOW DISTORTION, LOW PHASE SHIFT
- ✓ TO EXTRACT THE MOST FROM THE UNIQUE TRIODE/PENTODE TUBE
- ✓ STATE OF THE ART POWER REGULATION / CONSISTENCY / RELIABILITY
- ✓ SIMPLICITY OF DESIGN, FUNCTION, SIGNAL PATH
- ✓ THE SONIC VIRTUES OF A S.E. DESIGN WITH THE POWER, CONTROL AND BASS PERFORMANCE OF A PUSH/PULL DESIGN
- ✓ TO BECOME THE COMPACT TUBE REFERENCE INTEGRATED AMPLIFIER

HIGHLIGHTS:

- Proprietary differential feedback design—applying positive and negative feedback simultaneously for greater control, stability, lower distortion and *remarkable realism*
- Noticeably quiet--optimal signal paths, proprietary PCB design and hi-fi grade transformers specified for this tube design
- World class phono stage (solid state)

SPECIFICATIONS

Tube Type: **6BM8 / ECL82**

Rated Output: **10 Watts** (First 5 Watts in Class A)

Operation: **Class A/B2 Auto bias**

Total Harmonic Distortion: **Less than 1%**

Hum & Noise (A-Weight): **90 db or better** at rated output (conservatively rated)

Frequency Response: **20-20,000Hz+/-1db at 1 Watt** (38-18,000Hz at 10W)

Input Sensitivity and Impedance: **Main Input - 465 mv / 100k ohm**
